The Journal of Supercomputing
Volume 1, 1987

An Introduction to the Multistage Cube Family of Interconnection Networks, Howard Jay Siegel, William Tsun-Yuk Hsu, Menkae Jeng.....13

A High-Performance Fast Fourier Transform Algorithm for the Cray-2, David H. Bailey.....43

Digit Pipelined Processors, Mary Jane Irwin, Robert Michael Owens.....61

Supercomputer Performance Evaluation: Status and Directions, Joanne L. Martin, Dieter Mueller-Wichards.....87

Data Organization in Large Numerical Computations, J.L. Bell, G.S. Patterson, Jr.....105

Challenges in Advanced Semiconductor Technology for High-Performance and Supercomputer Applications, C.M. Osburn and A. Reisman.....149

Factoring: Algorithms, Computations, and Computers, D.A. Buell.....191

A Parallel Version of the Continued Fraction Integer Factoring Algorithm, M.C. Wunderlich and H.C. Williams.....217

Cost-Effectiveness of Concurrent Supercomputers, H.L. Resnikoff.....231

Parallel Implementation of the Quadratic Sieve, T.R. Caron and R.D. Silverman.....273

Solving Systems of Large Dense Linear Equations, R.G. Grimes.....291

Parallel Algorithms and Architectures, D.A. Buell et al.....301

Letters to the Editor, W.P. Petersen.....327

Book Review, J. Riganati.....337

On the Design and Performance of Conventional Pipelined Architectures, Nigel P. Topham, Amos Omondi, Roland N. Ibbett.....353

On the Notion of Granularity, Clyde P. Kruskal, Carl H. Smith.....395

Performance Comparison of the CRAY X-MP/24 with SSD and the CRAY-2, Richard E. Anderson, Roger G. Grimes, Horst D. Simon.....409
